## Overview

Commenting on the results, **Mr. Ajai Chowdhry, Chairman & CEO, HCL Infosystems Limited** said, “As the largest India facing ICT organization, HCL over the last year has continued to invest for tomorrow with a strong focus on our long term vision of building services and system integration practice besides the core business. The year saw continued impetus in the System Integration business with exciting projects across segments. To re-enforce HCL’s position in the Security market, we have launched our 100% subsidiary HCL Security this year. HCL’s future growth strategy deeply focuses on India, the fast growing ICT market and this is sure to consolidate our position in the Indian ICT market.”

### Key Catalysts for Growth

The future for domestic market is exciting with Indian IT industry projected to grow manifold over the next few years and the domestic market expected to grow at a CAGR of 15.8%, as per IDC. The PC market registered a decline over last year with regards to total PC sales between April 2008 and March 2009, with desktop computers, notebooks and netbooks taken together at 6.79 million (67.9 lakh) units, as per MAIT report.

The consumer sentiment was subdued due to slowdown in the global economy which impacted the retail IT sales and enterprise buyers. The Government uptake of IT saw growth this year. The Government’s focus on IT was displayed in the announcement of several critical nation building projects. Infact, many of the initiatives in this year’s union budget recognize the role the IT industry can play in creating substantial employment opportunities, boosting economic activity and overall development of the country. The IT industry will be keen to partner with the Government in expanding e-governance initiatives including modernization of employment exchanges, the UID project, and smart cards for healthcare services so as to achieve enhanced governance.

Apart from IT arena, ICT solutions in System Integration space for different segments stands to gain from the current market scenario. The Indian telecom market continues to grow. Driven by increase in subscriber base and demand for infusion of new technology for 3G and Value Added Services. Further, the expansion of broadband network across the country is acting as a catalyst for deployment of ICT based infrastructure & services in the field of education, healthcare, eGovernance and all aspects of business services. This will have a direct impact on the lives of people in rural India and providing access to facilities like rural credit, information kiosks and healthcare.

As per industry estimates, an estimated 56 percent rural households and 12 percent urban households are still without adequate access to electricity and peak power shortage of around 15 percent, availability of power is viewed as critical for the economy to maintain its high growth rate. India’s power ministry plans to provide electricity to every household by 2012, and invest in new generation, transmission, distribution

infrastructure. To achieve this goal, electricity generation and distribution capacity will need to be increased by an amount greater than what has been available in India for the last fifty years. One of the key component of this is the power sector reforms, will be focusing on rural electrification, Substation Automation and Management of both Demand and Supply side to reduce losses and increase efficiency.

The year 2009 is expected to herald the beginning of a new business cycle. The issues in the short run, will be productivity, cost savings and customer retention. This would pave the way for innovative services (*for both consumers as well as enterprises*) by leveraging the existing infrastructure so as to align it with emerging opportunities, and players who are uniquely positioned to take advantage of such opportunities will be benefited.

## Business Highlights for FY 08-09

### ICT Products

Delivering the best in global technology to its customers, this year HCL continued to innovate and demonstrate its leadership in the ICT arena. HCL showcased its future range of products and launched breakthrough customer service technology at the four-day 'Computex 2009', the largest computer exhibition in Asia and the second largest in the world held at Taipei, Taiwan. HCL provided a preview of two upcoming products at the event – 'HCL Electron' – WiMAX enabled Nettop and 'HCL thin & light laptop' based on Consumer Ultra-Low Voltage (CULV) platform. Besides this, HCL also showcased World's first 'in-built design for support' on HCL desktops and laptops - a unique concept that helps customers with quick support on-the-go.

The year has seen introduction of path breaking initiatives and services from HCL. Among the most noticeable products introduced during the year was the launch of HCL netbook "MiLeap MH04' based on Intel Atom processor Technology, an environment friendly RoHS compliant computing device targeted at consumers, educational institutions and corporates. The year also saw the launch of 'HCL Leaptop Series 39' with unique ATE technology. Developed under its "Design for India" program, this product is designed to offer comfort under long working hours by keeping the laptop surface temperature under control.

HCL announced new solutions for the Computer Aided Design (CAD) and Digital Content Creation (DCC) markets. Based on the latest NVIDIA Quadro FX470 GPU, HCL launched its new workstations "HCL Infiniti Challenger 5150. This year also saw the launch of the affordable high performance workstation "HCL Net Graph 108 which was developed specifically to cater to ever growing needs of high end desktops users.

HCL also saw growth in its High Performance Computing space as the company bagged orders from leading research and educational institutions of the country. The company also bagged orders for deploying servers from leading banks and PSU undertakings and state electricity boards of the country.

In the enterprise IT products space major orders were received to deploy desktops, servers and networking products from the leading names across industry verticals including corporates, government, education and BFSI segments.

The company also launched a pioneering initiative in the Indian ICT sector to further strengthen its customer care services. This year, HCL announced the launch of 'HCL Touch' its 24X7 round the clock, service & support for its customers. 'HCL Touch' sets a new benchmark for IT service in the country and offers the support that today's users need round the clock.

Building on its strategy of setting up technology "Centre of Excellence", HCL launched its "Network Centre of Excellence at Noida for developing solutions in the fields of routing & switching, wireless security, unified communications and digital media systems. Earlier this year HCL also inaugurated Software Development Centre 'Centre of Excellence for BFSI products at Jaipur. HCL established the centre with the objective of designing & developing customized software solutions for the eGovernance and for Banking, Financial Services and Insurance (BFSI) Segment.

HCL announced a tie-up with Korean major Nautilus Hyosung, to provide complete ATM solutions for Indian banks across the country with special emphasis on service offering for rural India. The "HCL Nautilus" range of ATM's will offer products that have been customized to the various requirements of the Indian Market. HCL & Nautilus also plans to introduce Rural ATMs meant for deployment by banks in locations with relatively low transaction volumes and also help in the Financial Inclusion initiatives of banks. This solution is thus the ideal vehicle to offer cost-effective ATM convenience to the largely untapped rural areas taking the power of banking to every Indian.

The year saw HCL won an order of over Rs. 40 crs from the largest public sector bank State Bank of India and associated banks to deploy, maintain & service Automated Teller Machines (ATMs). HCL will deploy over 1000 ATMs and cash dispensers across the country. The state of the art ATMs will come with enhanced features like Braille enablement and support for multi lingual content.

The year saw HCL wining prestigious Audio Visual System Integration orders from leading corporates for installation of solutions for the Video Conferencing Rooms and Board Rooms including setting up of complete high-end integrated solutions for Data Walls and Digital Signage's. HCL registered growth in the Projector business. Major wins have come from diverse sectors including financial institutions, state government, educational institutions and defence. This quarter saw the launch of E Classroom solution to facilitate classroom learning.

In the Telecom Business, HCL saw wins to set up Video Conferencing & Voice Solutions from the government and corporate sector including a global retail major.

This year the company also entered into new tie-ups. HCL signed agreement with Océ of Netherlands & Konica Minolta from Japan for high-end production printers. HCL also inked a pact with Dassault and Aveva

to provide virtual reality solutions. This quarter saw HCL launch Vennfer desktop videoconferencing solutions that provide convenient video conferencing solutions through personal computers.

This quarter, the company demonstrated its leadership in delivering products & solutions that are customized and are specifically suitable for the Indian environment. The Company supplied “Point of Sale” hand held terminals used in the process of bill generation for leading state electricity board. The company also bagged a prestigious order to provide automated milk collection solutions from one of largest milk production companies of the country. Taking forward its technology leadership in Retail segment IT Infrastructure, HCL unveiled POS solution- HCL Ambience PowerMate. With the ability to run off a automobile battery, this solution is ideally suited for a mobile Retail outlet. It not only has the capacity to work for 4-5 hours during power failures, it also has a small footprint making it an ideal POS solution for the small and medium retail outlets, including the “Mom & Pop” shops. This year HCL also rolled out its range of end-to-end retail business solutions which encompass, branch roll out, total outsourcing, warehousing & CRM solutions.

### **Consumer Business**

This year the focus has been on investing and building “the Brand” through innovative and effective methods. The company launched its online promotion campaign and successfully reached out to its target audience for its range of Laptops.

This Republic day, HCL launched a special promotional scheme, to promote the concept of computing among the masses and to ensure that masses in India should benefit from the power of Information Technology. The HCL offer was rolled out in association with a large format retail chain across the country.

In order to maximize benefit of its path-breaking service ‘HCL Touch’, to the customers, the company organized a series of dealer-partner training sessions and undertook an awareness campaign on this initiative by covering more than 600 retailers which included Multi Brand Outlets (MBOs), HCL Digilife Stores and large format retail outlets across the country.

This year HCL also introduced MTV Leaptops, designed especially for today’s youth. These limited edition leaptops came with a MTV skin to flaunt around. This special range was powered by latest NVIDIA Geforce graphics engine, for perfect gaming and multimedia applications, plus they come with a stylish MTV Bag pack with built in speakers. During the festival season last year HCL launched ‘HCL Ghar Lao Winner Ban Jao’ contest. The consumer promo was launched in the month of October 08, with host of attractive gifts on purchase of HCL Leaptops and Desktops. HCL also introduced its new website, wherein apart from having complete range on display, customer can purchase online. Keeping its focus on its channel partnerships HCL also rolled out its Channel partner scheme wherein channel partners were incentivized under various categories.

## System Integration

**Leading the way** - As part of the HCL's strategy of offering a single window to the enterprise customers for their ICT infrastructure and solution needs, HCL's System integration and services continues to expand and consolidate the strength of the company in this space. Among different verticals, HCL won major orders for System Integration from eGovernance, Railways, Power, Telecom, BFSI, Security, Education and infrastructure verticals.

**New Initiatives-** HCL Infosystems launched HCL Security Ltd, a 100% subsidiary of HCL Infosystems to provide Integrated SI solutions in the field of Security & Surveillance. The new company introduced the unique concept of a 'Safe State'. 'Safe State' is an architecture that leverages technology to build a security framework that safe guard life, infrastructure & society. 'Safe State' is an integrated technology solution that can help secure a state, city and critical / vulnerable area, building or facilities like Hotels, Hospitals, educational institutions, Transport, Railways, IT - ITeS establishments, Utilities, Sez's etc. Key feature of Safe State is that it integrates technology with physical surveillance and security solutions making them work together.

**Demonstrating leadership in Telecom vertical** – The major orders bagged includes the Rs. 240 crs contract for state-run Bharat Sanchar Nigam Ltd (BSNL) that involved implementation of over 60,000 ERP licenses, making it the largest rollout in terms of licenses issued for any single project in the country. The system integration vertical also saw deployment of solutions for leading service providers & telecom NEP's.

**Strengthening BFSI & Co-op system integration portfolio** – HCL launched Centre of Excellence for BFSI solutions development at Jaipur with the objective of designing & developing products for the Banking, Financial Services and Insurance (BFSI) Segment.

In another win, HCL also successfully rolled out its Bilingual Banking Software 'HCL Bancmate' in the newly opened branch of Agrasen Cooperative Urban Bank at Hyderabad. HCL solution for the bank will facilitate 'Total Banking Solutions' to its customers with a focus to provide standard banking solutions at an affordable cost. The year also saw successful deployment of HCL's bankmate solutions for leading nationalized & cooperative banks of the country.

The company bagged the prestigious order to roll out the world's first large scale project on building a "Data Pool Consortium for Operation Risk" for India's premier banking organizations. HCL received orders to deploy "Cash Management System" for a leading bank in the country. HCL also won an order to deploy "Mobile Banking Solution" for a major nationalized bank. The solution will help the bank in effectively managing operations in the areas such as Balance Enquiry Fund Transfers, Cheque Related actions, ATM operations, Card related issues, Credit card, De-mat and Loan Services. The solution will also enable bank to offer Value Added Services like mobile top up and bill payments more effectively.

**Empowering power through System Integration** - This year saw completion and handing over of the project in System Integration Power vertical for Himachal Pradesh State Electricity Board (HPSEB) to introduce computerized billing and energy accounting package (IT Package) for HPSEB in Shimla. This is

for the first time in India that an integrated CRM & Network analysis framework has been implemented. HCL has successfully implemented 10 fully automated sub division benefiting over 70,000 consumers of Shimla operation circle, functions such as meter reading, billing and collection; energy auditing and accounting; MIS, redressal of consumer grievances, establishment of IT enabled consumer service centers have been covered. The project will provide services around 11 lakh consumers for 122 Sub Divisions across the state.

**Good governance through eGovernance** - In eGovernance System Integration space, HCL bagged order to implement solution for automating judiciary operations across the country. During the year HCL also implemented HCL Dial100 solution for the Police Control Centre across seven cities..

This year HCL also undertook a prestigious project with Uttar Pradesh (UP) State Government, in-order to facilitate disbursement of wages to workers under NREGA project. With an objective of creating an electronic monitoring and payment system, State Government of Uttar Pradesh partnered with HCL Infosystems to implement technology for issuing e-job cards to workers in Sitapur district in UP. HCL also deployed solutions for a reputed national welfare organization for Smart Cards to AIDS Patients for distribution of medicines & monitoring equipments

**Growth in HCL's Education system Integration vertical-** In the year 2008-09 HCL's Education system Integration vertical witnessed a healthy growth rate. HCL won prestigious project from leading educational institutions & universities such as IGNOU & NCERT. HCL also bagged orders from major institutes to deploy IT infrastructure and solutions for higher studies. HCL also announced the launch of '*HCL DigiSchool*', its state-of-the-art solutions designed for Indian schools that offer modern multimedia classroom with world class content.

**Integrating ICT solutions for Indian railways** – In Railways vertical for System Integration HCL deployed the solution & service centralize e-Procurement Solution to automate & integrate multiple processes & vendors and also involves payment gateway integration. In another win, HCL deployed ATVM Machines for automate unreserved ticket dispensing at 390 locations across India.

**Systems Integration for Media & Entertainment** - In Media & Entertainment SI Space, this year the company delivered end to end consultancy and technical solutions for “On Air” infrastructure for an FM channel in Siliguri and Sikkim. HCL also implemented the Media Asset Management system for one of the leading television broadcasters of the country. It is a prestigious and one of the most ambitious project that involved archiving of rare and priceless content for more than 0.15 million hours. HCL also rolled out the complete end to end solution for a Telugu General Entertainment channel. HCL has provided the complete technology solution for setting up the channel including Acquisition, Production, Post Production, Automation and Transmission solutions. The project comprised of designing of Studios, Production Control Rooms, Server Room, Master Control Room for final up-linking and down-link monitoring, supply of equipments, System Integration, Commissioning and Training.

In Media & Entertainment System Integration space HCL announced its tie up with NDS, the leading provider of technology solutions for digital pay-TV service, this tie-up will offer solutions to the cable TV operators who are looking at launching digital services on their networks. The tie-up will leverage NDS technology leadership along with HCL deep understanding of the domestic cable and broadband markets. The two companies will cooperatively offer pre-integrated solutions that are quick to implement and integrate, ensuring fast time-to-market while minimizing operational costs.

**Shaping infrastructure framework** - In infrastructure SI vertical this year HCL bagged the prestigious Highway Traffic Management System contract from an International infrastructure management company. HCL also won the contract to implement the Automatic Fare Collection System for the upcoming Metro rail transit systems in one of the major metros of the country. Yet another systems integration win in the Infrastructure vertical, was the contract to implement the Perimeter Security for one of the busiest International Airports in the country.

## Digital Lifestyle Retail & Distribution

During the year, HCL continues to grow the Digital Lifestyle business by adding new ICT products to its portfolio. During the year HCL expanding its range of Digital Lifestyle products, the year saw HCL entering into new alliances with global brands like Nintendo consoles, Sandisk flash memory cards, Cisco linksys, Kingston DRAM & Philips MP3 accessories. HCL received an encouraging response to these new alliances.

India continues to show growth in the mobile subscriber base with strong growth coming in from tier-2 and tier-3 markets. Nokia continues to be the leader and maintain its market share in the GSM handset market. HCL along with Nokia Corporation, announced to set up a joint venture to sell mobile value added services and entertainment content directly to consumers in India. The joint venture will be primarily be engaged in selling value added services for mobile devices.

## ICT Education

HCL CDC is ISO 9001:2000 certified for its processes and has 115 centers across the country out of which 104 are franchise centers and 11 company owned centers. This year, HCL introduced Institutional alliance program under 'K2 academy' Initiative. Under this initiative HCL has tied up with 55 colleges across India to offer ICT education to students.
